

AIRNERGY STREAM HS V2

ALLOW THE SKIN TO BREATHE...!

... for local application.

... for acute, preventive & curative purposes.

The AIRNERGY Stream HS V2 is an advanced development of the Stream device, consisting of two Streams in one. This allows for an application that is twice as fast and powerful, delivering vital energy through the skin.

The AIRNERGY Stream HS V2 is the consistent further development and complement to the AIRNERGY breathing devices (Spiro Vitalizers). While AIRNERGY Spirovitalization enriches the user with energy from within, the AIRNERGY Stream HS V2 uses comparable biotechnology to deliver energy transdermally — quite literally getting under the skin.

APPLICATION

The affected parts of the body can be “streamed” once to five times a day with the AIRNERGY Stream HS for 5 to 20 minutes. For this purpose, the device can simply be placed on the affected body parts or held.

The AIRNERGY Stream HS can be used for the following complaints:

- Joint problems such as hip, knee, shoulder, elbow, toe, foot, finger, wrist and spinal pain.
- Abdominal pain, headaches and migraines
- Bruises, sprains and burns
- Irritations of ears and sinuses, tinnitus and other ear complaints, eye problems, tooth and jaw pain as well as skin problems, cough, menstrual problems etc.
